

INTERNATIONAL WOMEN

In ENGINEERING DAY

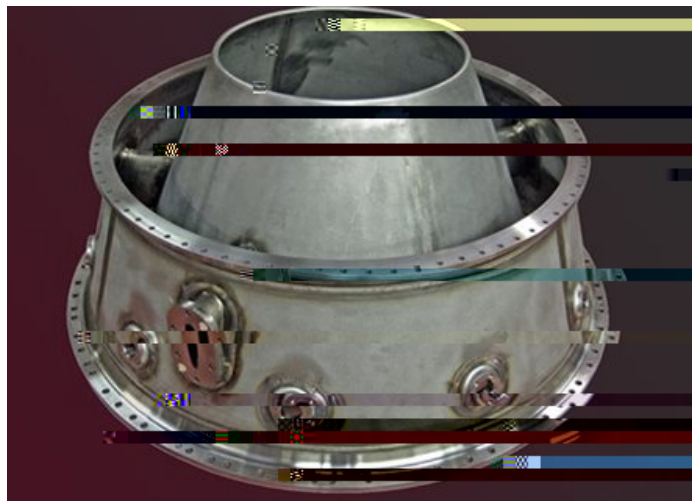

23 June 2018

Ewa Nakielska is a Quality Administrator at Nasmyth Ferndown, which is part of the Nasmyth Group of engineering companies.

At the International Women in Engineering Day 2018, Ewa Nakielska, Quality Administrator at Nasmyth Ferndown, will be speaking about her role in the company.

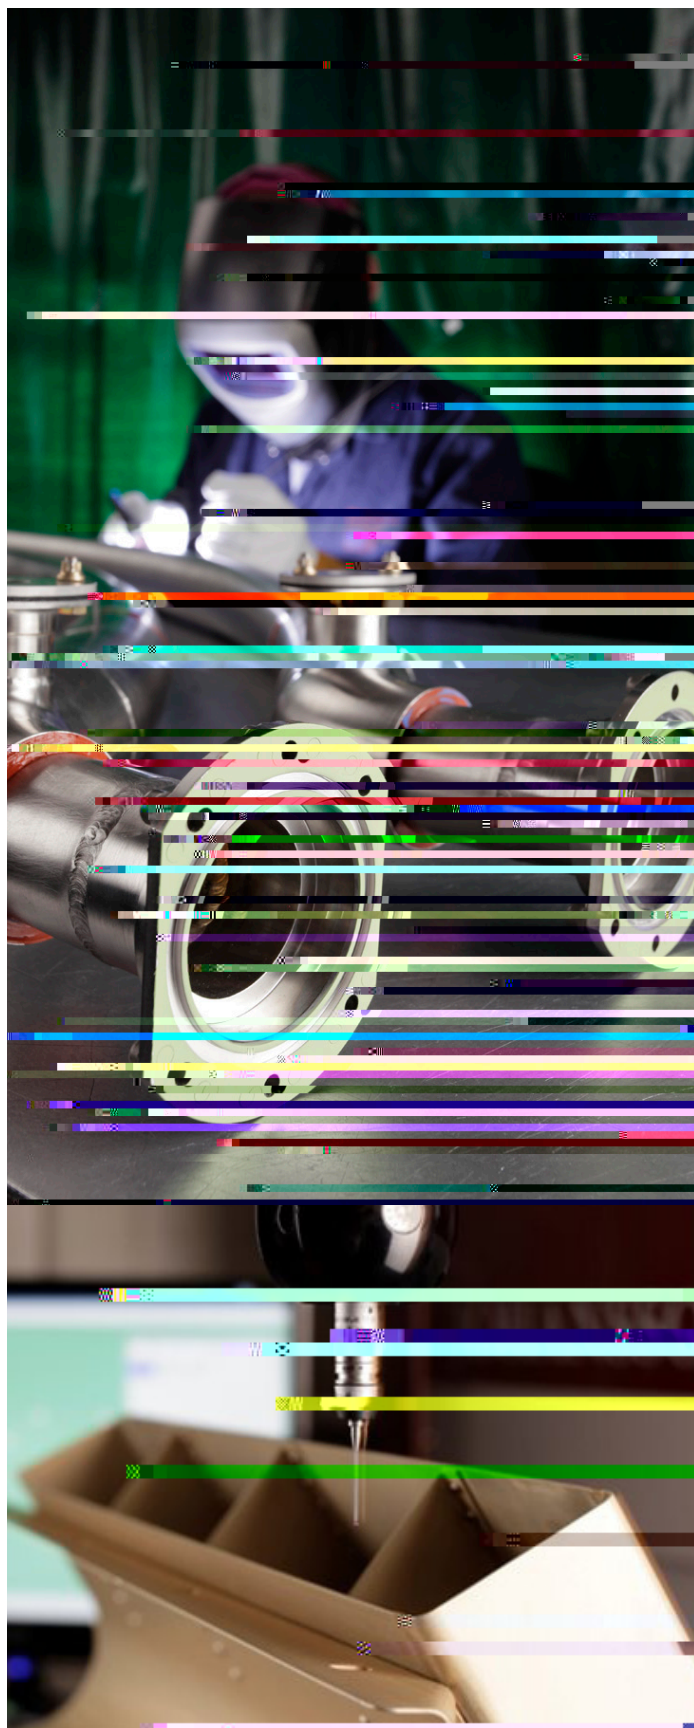

What is your role in the company?
My role is to ensure that the quality of the products we produce is maintained. I work closely with the production team to identify any issues and ensure that they are resolved as quickly as possible. I also ensure that all products are tested thoroughly before they are shipped to the customer.

What are the challenges of your role?
The main challenge is to ensure that the quality of the products is maintained throughout the production process. This involves working closely with the production team to identify any issues and ensure that they are resolved as quickly as possible. I also ensure that all products are tested thoroughly before they are shipped to the customer.

What are the benefits of your role?
The main benefit of my role is that I get to work with some of the most advanced technology in the world. I also get to work with a very talented team of people who are passionate about their work. Finally, I get to see the results of my work in the form of the products that we produce.

What advice do you have for other women in engineering?
My advice is to be confident in your abilities and to not be afraid to ask for help when you need it. It is also important to stay up-to-date on the latest developments in your field and to continue to learn and grow as a professional.
